## TECHNICAL SPECIFICATIONS

**Documents;** Manufacturer company, ISO 9001:2015 quality assurance system and EN 61587-1 15.01.2018 in the production of 19" cabinets. (Mechanical structures for electronic equipment) standards and submitted in the tender dossier.

**Standards:** Cabinets must be 19" in ETSI and/or EIA 310-D standards.

**Main Frame:** The main frame structure should have a monoblock bende structure that will increase the strength and durability of the cabinet. The cabinet structure should be formed as a result of combining the bottom case, top case and side panels. There should be folded cable entries in the top and bottom cases with dimensions of 50x100 mm, which can be easily bent by hand. There should be holes suitable for wall mounting in the rear door.

**Side Panel;** Fixed side panel that can be screwed to the top and bottom case.

**Front door;** tempered, secure, running-in, 4 mm. is glass. The front glass door must be at least 120 degrees openable, lockable, removable and can be mounted on the right or left when desired.

**Paint;** Cabinets will provide high resistance against impacts; 0,8mm sheet should be produced with RAL 7035 100gr Zn 35 micron film coated dx 51 sheet (EN 10143 EN10169).

**19" Mounting Rails:** will be formed as 2 pieces at the front of the cabinets. It should be produced in CNC punch benches with a precision of 1U=44.45 mm, with a square hole of 9.5x9.5mm, with a precision of +/-0.01. On the front faces of the 19" mounting rails, "U" " dimensions should be marked. 19" mounting rails should be manufactured and mounted in such a way that they can move along the depth of the cabinet.

**Areas of usage:** Wall mounted cabinets must have 4 wall mounting holes on the back surface for easy mounting on the wall.

**Shipment;** Soho Rack series products can be shipped disassembled.
